

# Allergy Statistics

The number of people in the UK suffering from allergic reactions continues to increase year-on-year at a rate of 5%, with children representing around 50% of these disturbing statistics. It is inevitable this subject regularly hits the headlines.

Our infographic shows some of the astonishing facts that may come as an unwelcome surprise...

**615%**

increase in hospital admissions for anaphylaxis in 20 years, 1992-2012 (Turner et al, JACI, 2015)

**150 MILLION**

people have allergies in Europe, the most common chronic disease

(EAACI, 2014)

**OVER 20,000**

admitted to hospital each year with allergy, 61.8 per cent (12,560) of admissions due to allergic reactions were emergencies, a 6.2 per cent increase (730) on the same period last year (11,830). (HSCIC, 2014)

**6-8% CHILDREN**

have a proven food allergy

(National Institute for Health and Clinical Excellence, 2011)

**UP TO 1 IN 5**

allergic people suffer a serious debilitating disease and are in fear of death from a possible asthma attack or anaphylactic shock

(EAACI, 2011)
